

Apokalypse now

[South China Morning Post](#): „Coronavirus: global death toll could hit 5 million by March, Chinese researchers say“.

A researcher at the Institut Pasteur of Shanghai who is investigating the coronavirus but was not involved in the study, said that if 5 million people died by March, it could lead to the collapse of the global health care system.

“People die en masse when they cannot get even the most basic care in hospitals,” said the person, who asked not to be named.“
