

Pentagon prepares for massive „final blow“ of Iran war

Die Insel [Larak](#) liegt südlich von Bandar Abbas. Man kann dort auch [Urlaub machen](#).

„In interviews with [Axios](#), officials and sources familiar with the internal discussions describe four major „final blow“ options Trump could choose from:

- Invading or blockading Kharg Island, Iran’s main oil export hub.
- Invading Larak, an island that helps Iran solidify its control of the Strait of Hormuz. The strategic outpost hosts Iranian bunkers, attack craft that can blow up cargo ships and radars that monitor movements in the strait.
- Seizing the strategic island of Abu Musa and two smaller islands, which lie near the western entrance to the strait and are controlled by Iran but also claimed by the UAE.
- Blocking or seizing ships that are exporting Iranian oil on the eastern side of the Hormuz Strait.“

Das sieht nach einem klaren und auch erfolgversprechendem Plan aus.
